

Press release

Hoststar Android App – manage information more mobile!

4 October 2011 / 12.00 p.m.

We are even more mobile now! – After the Hoststar iPhone App you also have the possibility as a Hoststar customer to manage your information about your webhosting with an Android device!

Because of the numerous feedbacks we received for our iPhone App, we are looking forward to present you our Android App. We now offer more customers the opportunity to access mobile to their data and different functions. Whether you carry out a change of address, recover invoices or apply for PHP settings – our Android App will help you! You also have the possibility to check the availability of all services on your server with the monitoring function. You do not understand the meaning of those services? No problem, because our Android App is your information platform for your webhosting.

Do you find a matching domain name for your website while you are being on the road? Simply start our Android App and get more information about the availability of the desired domain with the integrated whois search.

Take advantage as Android owner of this free offer as well and stay up to date all over the world.

This app has been specially created for Hoststar customers. It can not be used with other hosting providers.

Hoststar – a brand of the Multimedia Networks AG – stands for innovation, expertise and dynamism, and was founded in 1996. The Multimedia Networks AG has developed positively every year since then and is today one of the ten largest Swiss hosting providers. The company operates 480 servers with ultra-modern technology in data-processing centres in Switzerland, Germany and Austria. The entire infrastructure is monitored in our NOC (Network Operating Center). Hoststar attaches great importance to training and constantly puts this into practice in its own Learning Center. SMEs, private individuals, associations and public authorities are now part of our customer base and greatly appreciate our reliable service. The company currently takes care of 70,000 domains at home and abroad.
