

Press release

Hoststar webhosting – now on Facebook

12 January 2010

The time has finally come – hoststar.ch is on Facebook and hopefully you will visit us there too! On the new Hoststar fan page, you can meet like-minded people and see what others think about us. Become a fan and share new ideas, feedback and constructive criticism with us and the community.

Many companies have long followed the trend of using social platforms on the Internet. Hoststar won't get left behind and is taking a first step with Facebook.

Hoststar has now set up a fan page, so that anyone interested can find us on Facebook. Everyone can be a fan of our company and discuss topics related to webhosting on our Facebook 'Wall'. This opens the way to a new form of communication and exchange of views – for the fans and for the company. We welcome your fan input!

Hoststar – a brand of the Multimedia Networks AG – stands for innovation, expertise and dynamism, and was founded in 1996. The Multimedia Networks AG has developed positively every year since then and is today one of the ten largest Swiss hosting providers. The company operates 480 servers with ultra-modern technology in data-processing centres in Switzerland, Germany and Austria. The entire infrastructure is monitored in our NOC (Network Operating Center). Hoststar attaches great importance to training and constantly puts this into practice in its own Learning Center. SMEs, private individuals, associations and public authorities are now part of our customer base and greatly appreciate our reliable service. The company currently takes care of 70,000 domains at home and abroad.
