

Press release

New SSL offers – available now!

26 January 2009 / 4.30 p.m.

The new SSL offers are available now!

Secure Sockets Layer (SSL) Certificates provide secure communications between web users and websites. This technology authenticates the identity of the website and encrypts the communication between the user and the website. When you follow a link, how can you be sure that the resulting website is legitimate? Unfortunately, there are more and more phishing sites, which are hardly to be distinguished from genuine websites, but in which personal and financial information may be improperly stored and misused. With the SSL Certificate, it can be seen that your site has undergone a strict authentication process as regards the identity of the company. This is shown in the address bar by the display of 'https: //...'. With high-security browsers, part of the address bar is also marked in green.

Visitors to your website can thus immediately ascertain that the domain via which your website runs effectively belongs to you personally or to your company. This considerably increases confidence in you personally and your company!

Hoststar now offers its customers a choice of 3 different SSL Certificates. You can choose between the Free SSL, Standard SSL and Premium SSL Certificates. You will find that one of these is ideal for your website or your webshop.

Hoststar – a brand of the Multimedia Networks AG – stands for innovation, expertise and dynamism, and was founded in 1996. The Multimedia Networks AG has developed positively every year since then and is today one of the ten largest Swiss hosting providers. The company operates 480 servers with ultra-modern technology in data-processing centres in Switzerland, Germany and Austria. The entire infrastructure is monitored in our NOC (Network Operating Center). Hoststar attaches great importance to training and constantly puts this into practice in its own Learning Center. SMEs, private individuals, associations and public authorities are now part of our customer base and greatly appreciate our reliable service. The company currently takes care of 70,000 domains at home and abroad.
